

## GIVE WIRELESS CONCERTS SOON

T. U. Scientist Student to Erect Aerial on Roof of Building

Ever attend a wireless concert? That portion of the Tulsa public having direct interest in, and connection with, the University of Tulsa, will be invited to "listen in" at a radioconcert at the university as soon as a wireless receiving set has been installed and put into smooth operation. Halton H. Friend of Sand Springs, a freshman specializing in the sciences, has secured permission from university authorities to erect an aerial on the roof of the Administration building and will then connect it with a magnifying box in the main auditorium, where the sounds will be magnified so as to be audible to all.

With the instruments it will be possible to get concerts from Dallas, Denver, Kansas City, Rock Island, Ill., and Pittsburgh, Pa., most of which cities have wireless concerts every night. Usually the concerts are phonographic records being played in the wireless station, but sometimes the wireless instruments are placed in a hall where a real concert or musical program is being rendered.

Friend will transfer the wireless set from his home at Sand Springs where he set it up himself. The physics department of the university and the science club will use the instruments in experimentation. As the general public would not have great interest in the experimental phases of wireless telegraphy and merely hearing the staccato click of telegraph instruments magnified in volume of sound. The public will be invited to hear the instruments in action some evening next spring when it is known that a radioconcert can be received.

## MISSING MAN FOUND DEAD

Victim of Asphyxiation, But May Not Be Suicide.

PICHER, Dec. 14.—Death from asphyxiation Sunday morning at a hotel in Joplin is found to have been the fate of Crews Hurt, 24, who has been missing from his home in this city since Saturday, but whether his death was from accident or suicidal intent is not yet clear.

It is stated that there are some mysterious circumstances connected with the case and the Joplin authorities are said to be making further investigation.

Made Sure of Cow.

A tourist in Scotland came to a wide river. It was a stormy day and the wind was constantly increasing, but he asked a boatman to take him across. The latter agreed to do so, if the tourist would wait until he'd take his cow over.

Later, as they were nearing the opposite bank, the tourist connected with the boatman and asked, "Will you tell me why you took the cow over and made me wait?"

"Well, now," explained the old fellow, "I see the cow was valuable, and I feared, if the wind increased so the boat might upset on the second trip."

## Lincoln Girl Scouts Have Christmas Spirit

In these jolly Christmas times, when the mind turns toward helping the unfortunate to a better enjoyment of the season, the Girl Scouts are determined not to be left behind in the procession. In preparation for this event Sunflower troop of Lincoln school raised money by putting on sales of ice cream and candy, that the treasury might be ready for the strain. The scouts of this troop have bought a health band of the tuberculosis association, have sold \$10 worth of seals, and have made dresses for six children in the children's home. In addition to this they have obtained from the humane society the names of three worthy poor families and will see that each of them gets a well-filled Christmas basket and gifts for every member of each family.

## School Children Will Help Clothe the Poor

All pupils of the public schools of Tulsa are urged to gather up old clothing at their homes this morning and take the bundles to their respective schools for collectors sent out by the Lions club, who will call at each school building later in the day for the bundles. This clothing will be divided between the Salvation Army and the humane society for distribution among those in need. The school children are asked to ransack the closets of their homes for garments of all kinds which may be used by the poor kiddies and grown-ups of our city. The Lions club will see that this clothing is properly distributed.

## WHAT YOUR MEASURE?

Y. M. and Y. W. of T. U. Define What They Believe Qualities of the Perfect Man and Girl.

What are the characteristics of an ideal girl or an ideal man? University of Tulsa students think they know. The university Y. M. C. A. recently after a somewhat heated discussion finally agreed upon the qualities of the perfect girl, while the university Y. W. C. A. in separate session defined the perfect man.

"The not impossible she" has 13 characteristics, as catalogued by the young men. She should combine spiritual, social, mental and physical traits of character. She should not be prudish. She should be friendly and kind, but not boastful. She should be able to play the piano, wash dishes, cook and care for children. She should be neat. She should be punctual. She should not be a flapper. She should have common sense. She should be appreciative. She should be a good-looking as possible, within her means; no rouge. She should be a Christian. She should not be jealous. She should be capable of comforting well on any subject.

Coads went on official record as believing that the ideal man should be a Christian, gentleman and clean mentally. Second, he should love and respect his parents and show honesty, courage, sincerity, kindness and frankness to his fellow men. Third, he should always be in harmony with all good causes, both great and small.

Worthwhile News.

Candies this year are a great deal cheaper—yet the quality is the same. The Superior Tea Room sells assorted chocolates at only 80c per pound. Hard candies at 40c.—Advertisement.

## ISLANDS IN NEW PLEA

Four-Power Treaty Made Basis for New Claim by Philippines for Independence—President Called On.

WASHINGTON, Dec. 14.—The four power Pacific treaty was today made the basis of a new plea for independence for the Philippines.

In a letter presented to the president by the Philippine resident commissioners, Jaime C. de Yerra, and Isauro Gahabdon.

The plea for independence made by the commissioners, declared that in the past the principal objection to independence for the Philippines

has been that such action might make way for Japanese aggression in the islands. It was declared, that under the terms of the four power Pacific treaty, such aggression would be impossible and that therefore the great obstacle to independence is wiped out and the Philippine people are anxious that the administration take quick action to grant them entire governmental freedom.

To keep humid the air in a room in which it is used a new electric fan is provided with means for distributing fine particles of water in its breeze.
